This classification applies to entities performing installation, servicing or repair of alarm systems and related exposures; e.g. electrical wiring within buildings, intercom systems, closed circuit television systems, access control systems, telephones, etc.

Verify:

Ø Applicant is experienced in operations and properly certified or licensed as required by state or local authorities.

Ø Products used by applicant are approved and labeled by Underwriters Laboratory (UL) or Factory Mutual.

Ø Applicant requires pre-employment screening that includes a complete character investigation, clearance of fingerprint data from a law enforcement agency and verification of previous employment.

For multiple named insured requests, we will need a complete description of operations for each entity.

Obtain copies of all contracts used by the applicant. We will review contracts to confirm they contain liquidated damages, third party indemnification, and right to assign provisions. All clients must sign the contract.

Obtain a copy of all brochures and literature used by the applicant and forward to us with the policy.

Refer to Company Program - Repair and Service Operations for Automobile Alarm or Stereo Installation.

SUBMIT TO BROKERAGE

. Risks who install systems for medical institutions (e.g. hospitals, nursing homes, etc.)

. Risks who install medical alert systems for home health care.

PROHIBIT

---

Untitled

- Risks who install systems for penal facilities or financial institutions.

- Product coverage for alarm manufacturers or products sold under applicant's label.
